

January 15, 2017

Dear Customer:

A.J. Oster sells products from suppliers that comply with the requirements of the following European Union regulations/directives:

- Restriction on the Use of Hazardous Substance (RoHS) Directive
- End of Life Vehicle (ELV) Directive
- Global Automotive Declarable Substance List (GADSL)
- Registration, Evaluation, Authorization, and Restriction of Chemical Substances (REACH)

Furthermore, these products do not contain any of the substances in the most recent Substances of Very High Concern (SVHC) list under the Registration, Evaluation, Authorization, and Restriction of Chemical Substances (REACH) Regulation. A.J. Oster has also determined that the strip products we sell are “articles” under REACH and therefore exempt from any registration requirement.

In addition to this A.J. Oster participates in the International Material Data System (IMDS), a tool to aid in compliance with the ELV.

This representation applies only to products as they are sold by A.J. Oster. Each importer into the European Union should make its own determination as to whether products manufactured from or otherwise incorporating products sold by A.J. Oster continue to comply with these Directives and Regulations.

Sincerely,

*Peter D. Szatkowski*
